

Hi-Tech UV Greenhouse Film

Our wide range of greenhouse films has the following characteristics:

- up to 5 years' UV stability
- infrared reflection
- anti-dew effect

The UV stability of the individual greenhouse film can be adapted to suit different climatic conditions around the world.

The following types are available from our standard range:

Hi-Tech UV Standard Standard greenhouse film with 1 - 5 years' UV stability

Hi-Tech Thermic With additional infrared absorber additives

Material:	LDPE
Film type:	Co-extruded film
Thickness:	0.18 - 0.2 mm
Width:	4 m - 16 m
Length:	25 m and 50 m
Jumbo rolls:	100 m - 500 m
Colour:	Transparent, translucent green
Supplied as:	Tubular film, semi-tubular film, or tubular film with drawstring

Mechanical properties:

Dart drop > 540 g
ASTM D1709

Tensile strength in N / mm ² EN ISO 527	longitudinal 18	transverse 16
--	--------------------	------------------

Tear resistance in EN ISO 527	longitudinal > 450	transverse > 650
----------------------------------	-----------------------	---------------------
