

Packaging film

Packaging films are technical films manufactured using the latest raw materials. They are produced in state-of-the-art production facilities, and consequently have very good mechanical properties which enable them to be processed further with excellent results.

The packaging films we produce include for example shrink film and industrial tubular film.

Material	LDPE
Film type:	monofilm or co-extruded film
Thickness:	from 0.02 mm
Width:	30 cm to 6 m
Length:	from 15 m
Jumbo rolls:	100 m to 1000 m
Colour:	by request
Print:	photo plate printing and ink-jet printing

Technical data available on request.

Other sizes and grades possible.
